Hyderabad | +91-8074453216

### EDUCATION

---

**CMR Engineering College**, Medchal, India

*Bachelor of Technology in Computer Science and Engineering*, GPA: 6.5/10

June 2020

Related Courses: Data Structures, OOP, Internet of Things, DBMS, OS, Computer Networks

### TECHNICAL KNOWLEDGE

---

**Programming Languages:** Javascript, C, Java, C++

**Frameworks & Libraries:** Node.js, Express.js, Angular

**Databases:** MongoDB, MySQL

**Tools & Technologies:** VS Code, Postman, Jira, Rally, Bitbucket, Git

### CERTIFICATIONS and PARTICIPATIONS

---

- Participated in Ethical Hacking Competition and encrypted a given text file of size 15 GB using Caesar cipher shifting technique with custom shift input given by the user
- **AI For Everyone** certification from Coursera
- Completed Front-End Web UI Frameworks and Tools: Bootstrap 4, Coursera

### PROJECTS

---

#### **CPDM Central and CPDM Unification**

March 2022 – July 2023

- CPDM is a consolidated platform for product owners to select compliance guidelines when creating a product/project. It is an integrated application where selected guidelines can be converted into user stories using Rally/JIRA.

#### **Cloud Data Centers Electricity Consumption Maintenance and Balance**

December 2019 – June 2020

- Implemented Eco-Multi Cloud technique, a load management tool that optimizes energy cost variations and the presence of local renewable energy sources at data center in order to reduce the energy bill.

#### **Bug Tracking System for Improving Software Reliability**

August 2019 - November 2019

- Designed and developed bug tracking system which uses bug id to track the bugs and store them in a database to update their status with ease.

### KEY ACTIVITIES PERFORMED

---

- Responsible for front-end coding using Angular 8
- Developed RESTful API coding using Node JS
- Responsible for code deployment

### DECLARATION

I hereby declare that all the above mentioned details and qualifications are true and unto the best of knowledge.
